

AI Beliefs — AI Literacy and Limitations

Response distributions by condition | Reversed items rescored

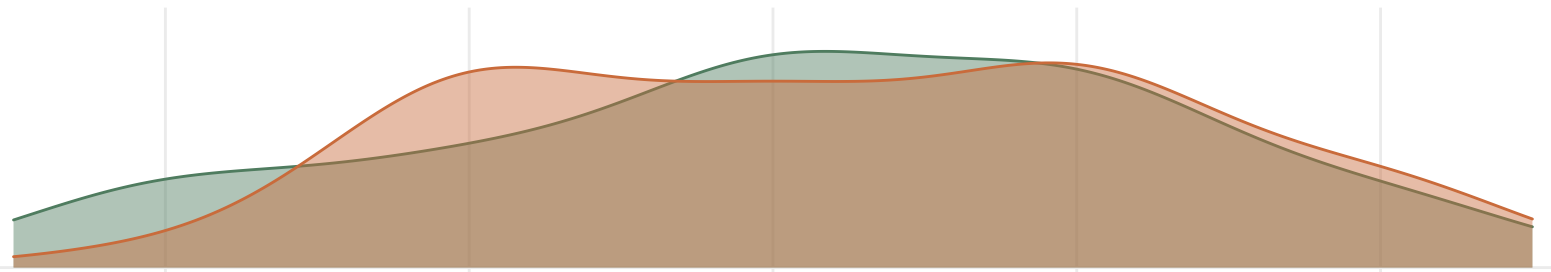

Bandwidth = 0.6 on 1–5 ordinal scale. Bimodal ridges = polarized item.

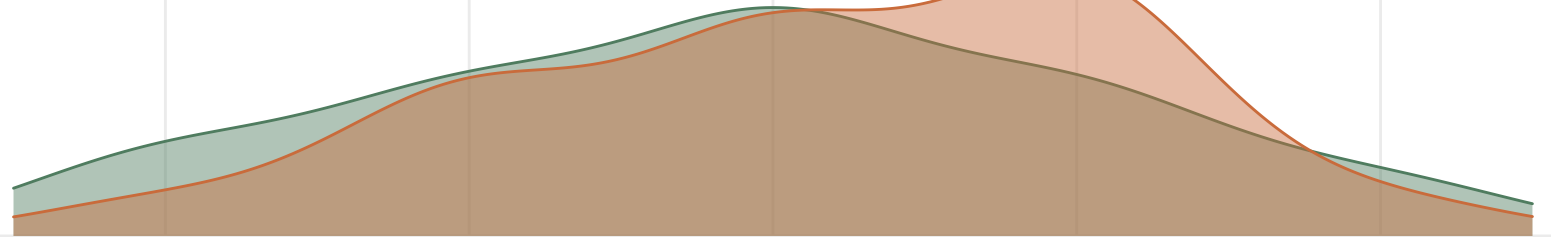

# AI Beliefs — Academic Utility

Response distributions by condition | Reversed items rescored

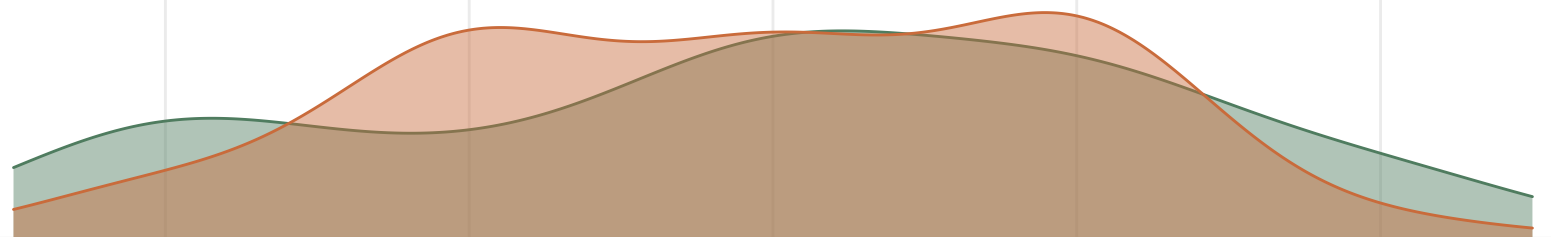

Item 6: Students must learn how to use generative AI technologies well for their career

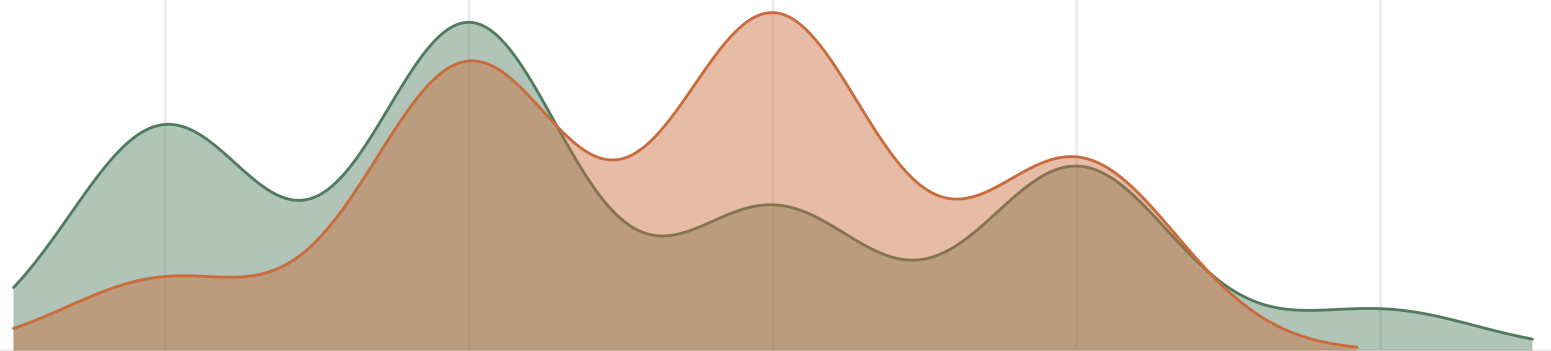

Item 7: I believe generative AI technologies such as ChatGPT can improve my digital competence

Item 8: I believe generative AI technologies such as ChatGPT can improve my overall academic performance

Item 9: I think generative AI technologies such as ChatGPT can help me become a better writer

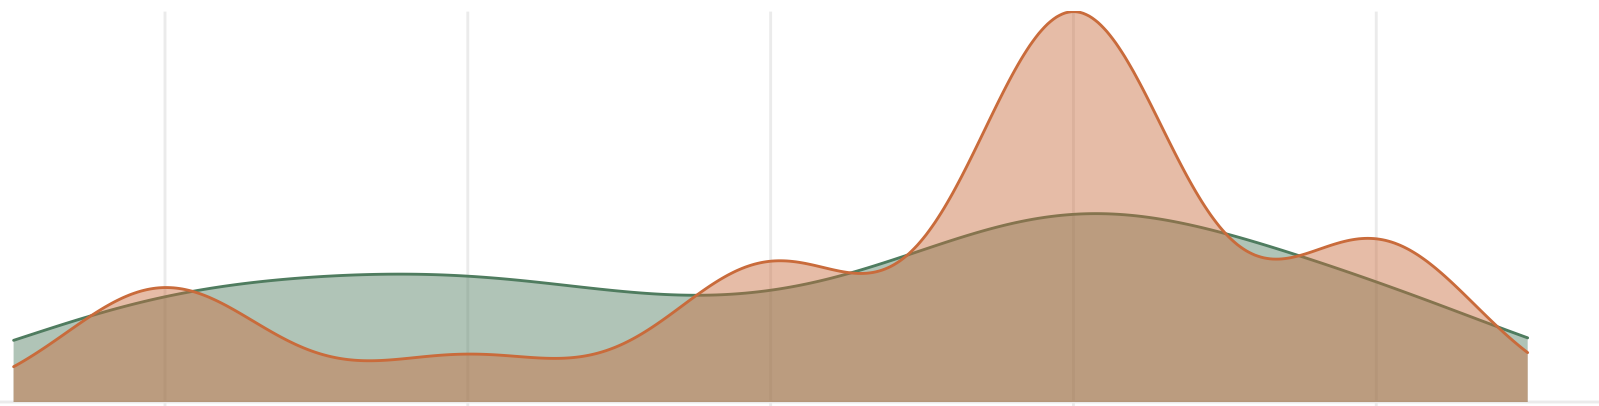

Traditional\_First AI\_First

Bandwidth = 0.6 on 1–5 ordinal scale. Bimodal ridges = polarized item.

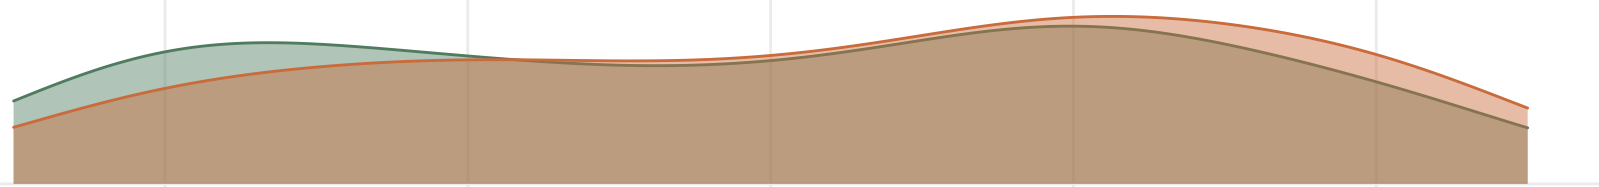

# AI Beliefs — Psychological Comfort and Anonymity

Response distributions by condition | Reversed items rescored

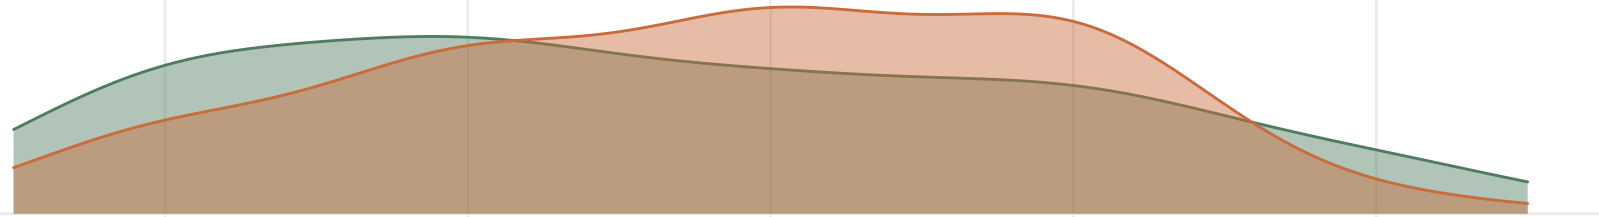

Item 10: I can ask questions to generative AI technologies such as ChatGPT that I would otherwise not voice out to my teacher

Item 11: Generative AI technologies such as ChatGPT will not judge me, so I feel comfortable with it

Item 12: I think AI technologies such as ChatGPT is a great tool for student support services due to anonymity

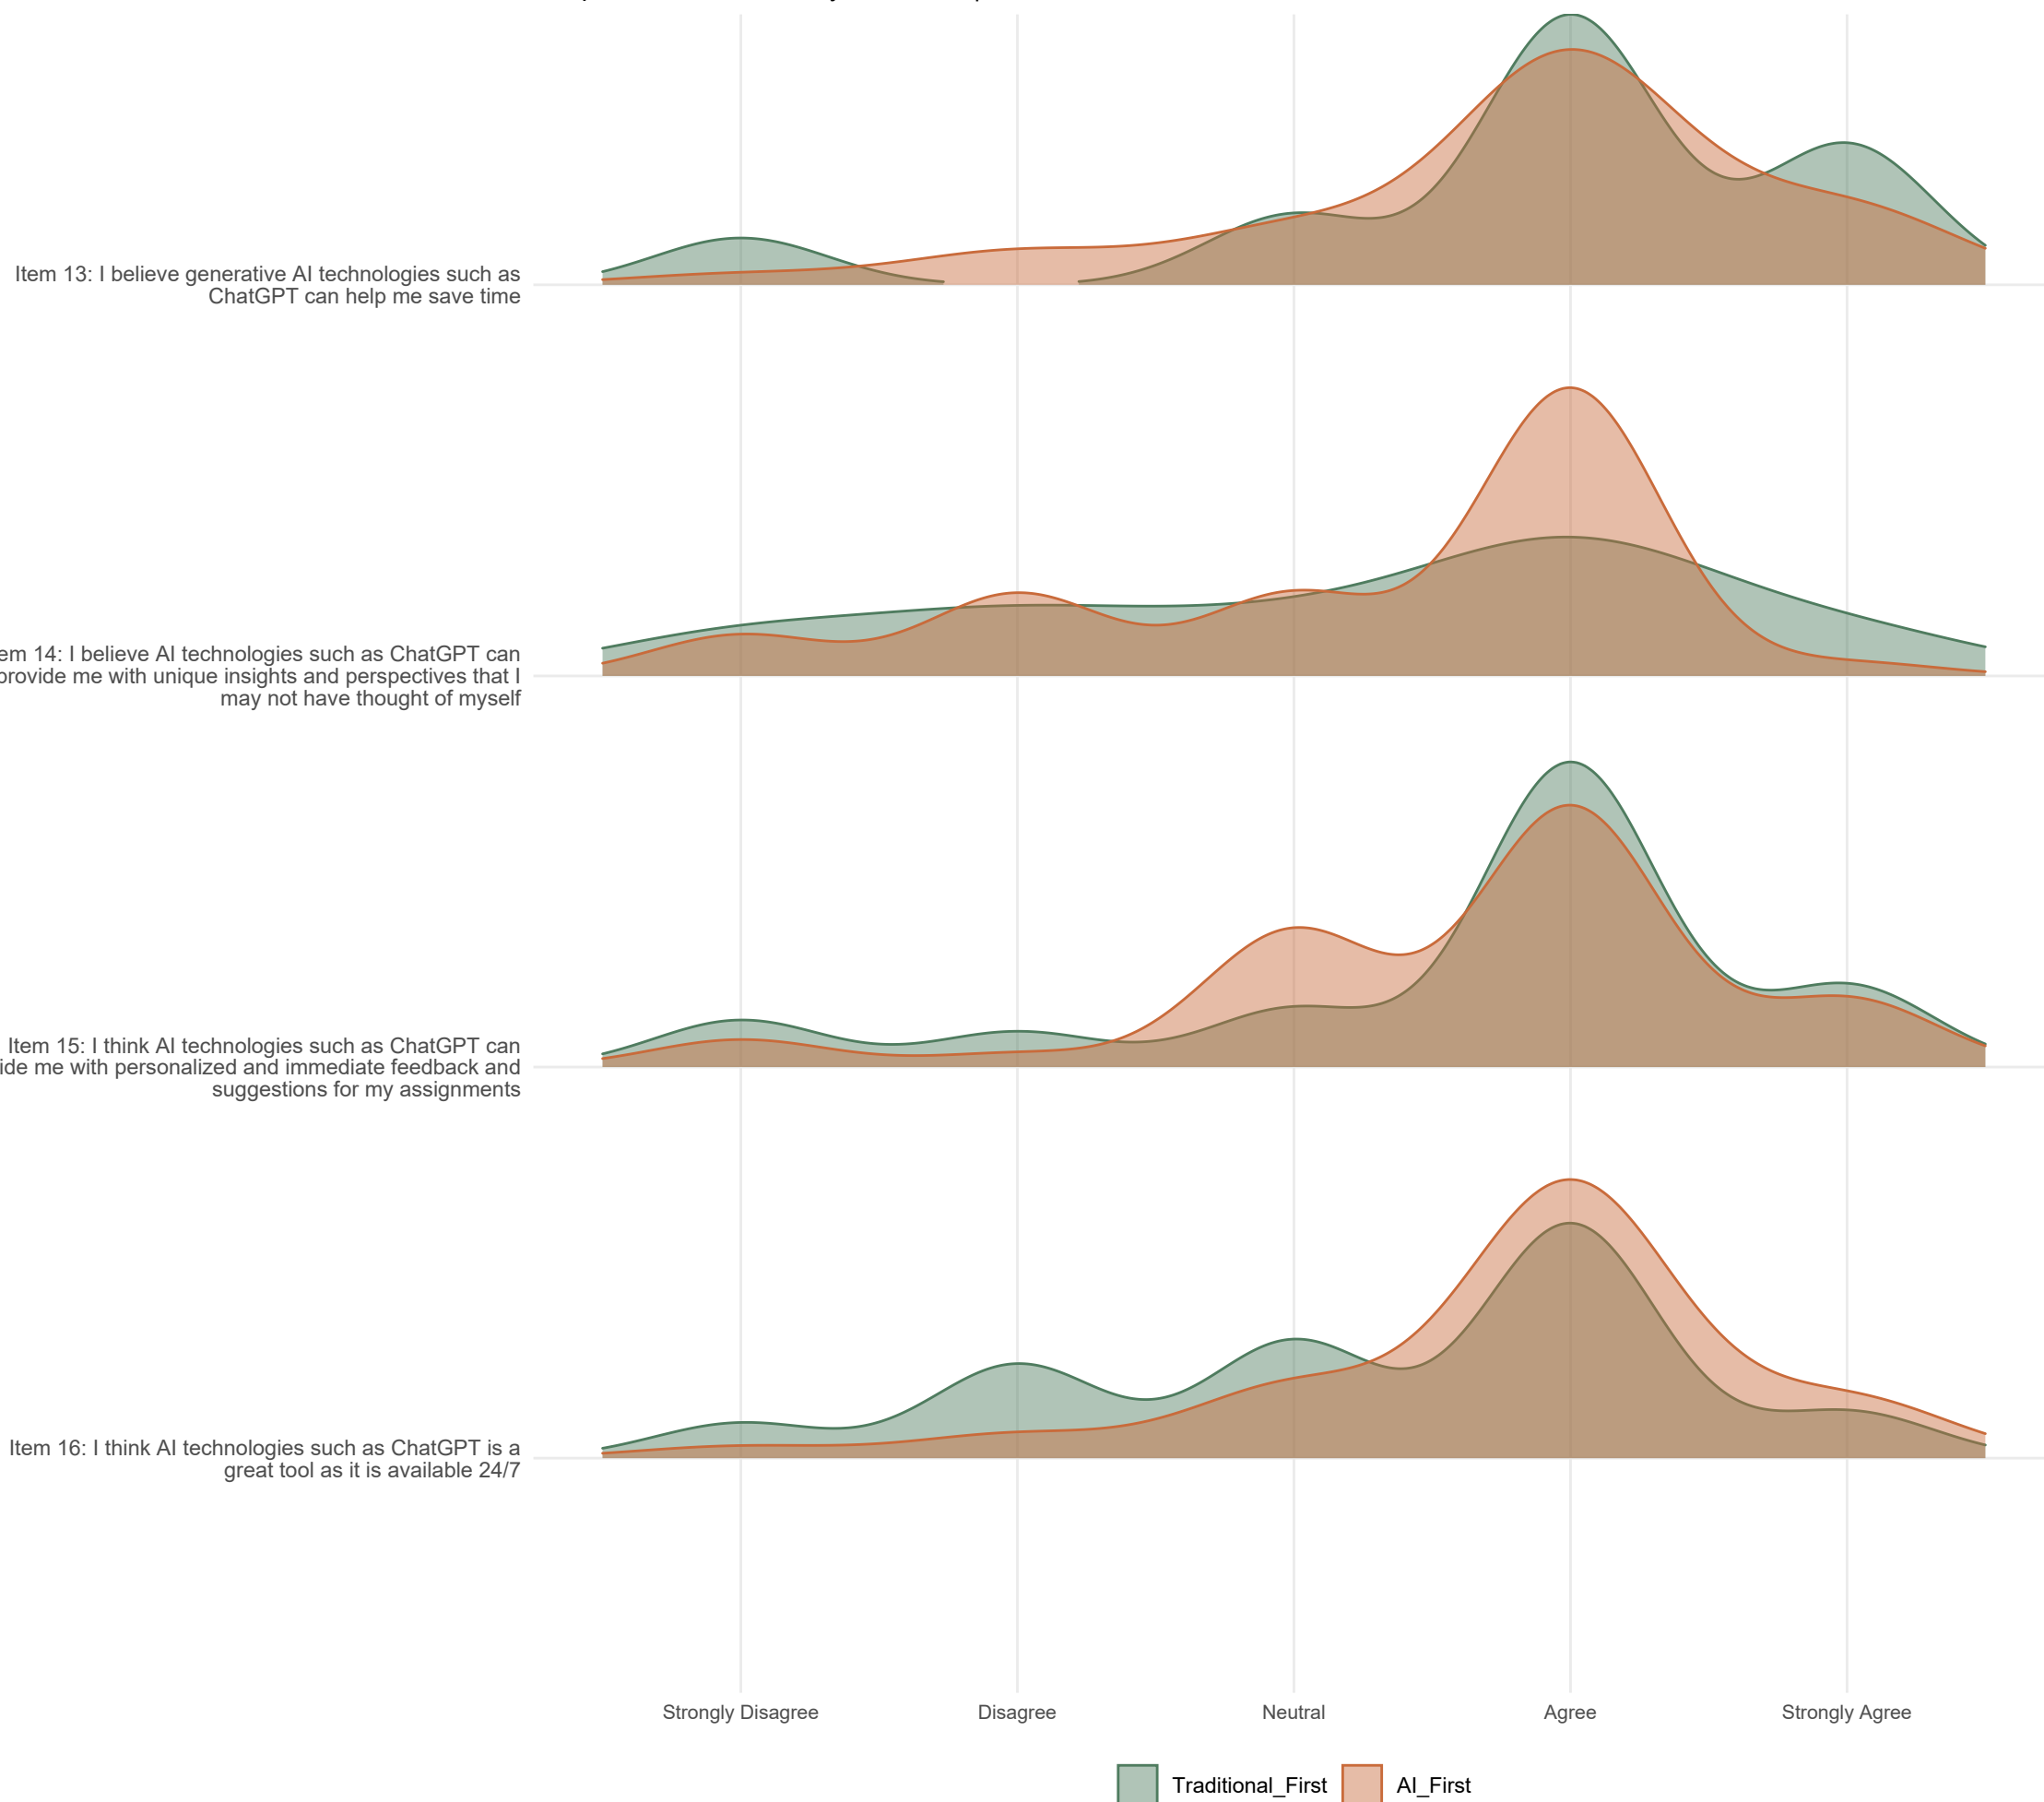

Traditional\_First AI\_First

Bandwidth = 0.6 on 1–5 ordinal scale. Bimodal ridges = polarized item.

# AI Beliefs — Practical Convenience

Response distributions by condition | Reversed items rescored

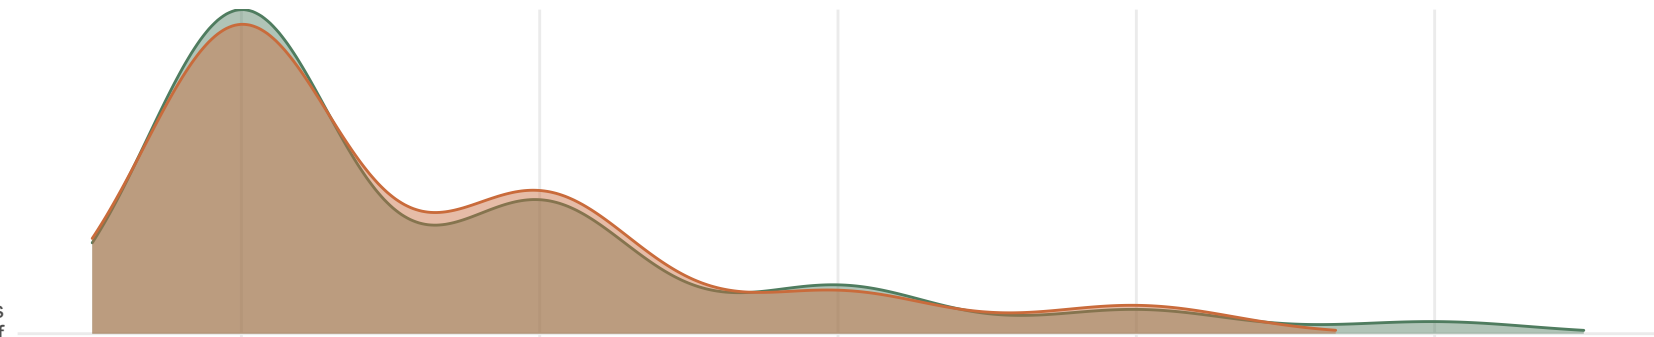

Bandwidth = 0.6 on 1–5 ordinal scale. Bimodal ridges = polarized item.

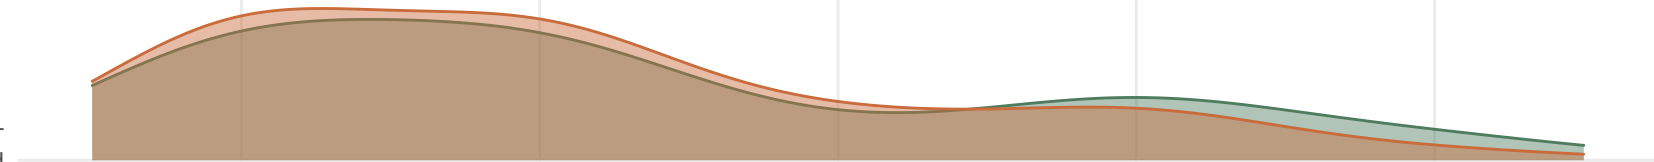

# AI Beliefs — Risks and Concerns

Response distributions by condition | Reversed items rescored

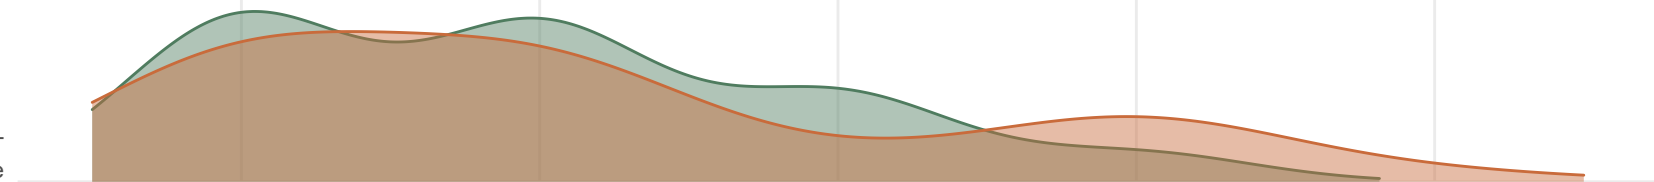

Item 17: Using generative AI technologies such as ChatGPT to complete assignments undermines the value of a university education

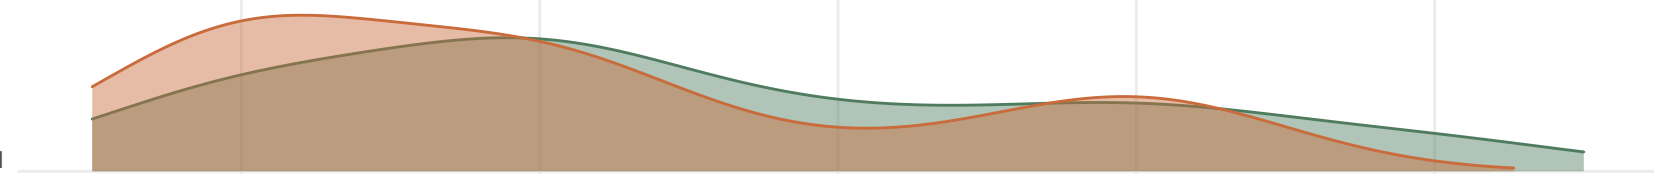

Item 18: Generative AI technologies such as ChatGPT will limit my opportunities to interact with others and socialize while completing coursework

Item 19: Generative AI technologies such as ChatGPT will hinder my development of generic or transferable skills such as teamwork, problem-solving, and leadership skills

Item 20: I can become over-reliant on generative AI technologies

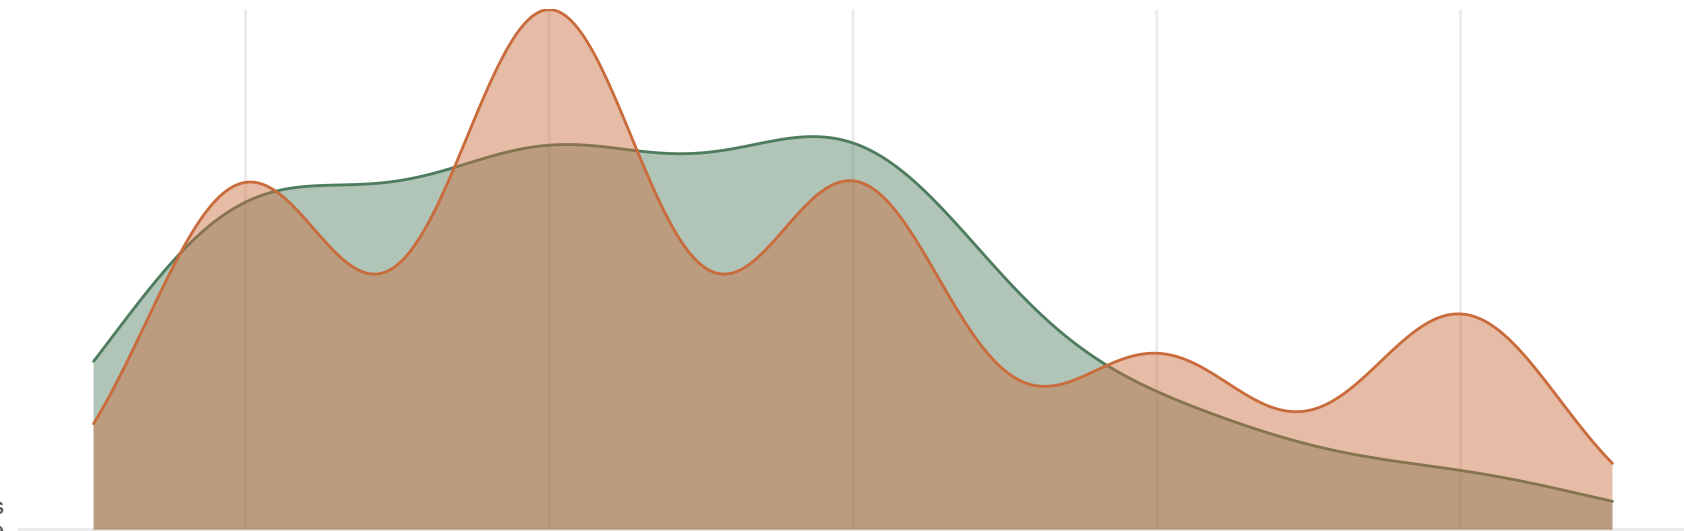

Traditional\_First AI\_First

Bandwidth = 0.6 on 1–5 ordinal scale. Bimodal ridges = polarized item.

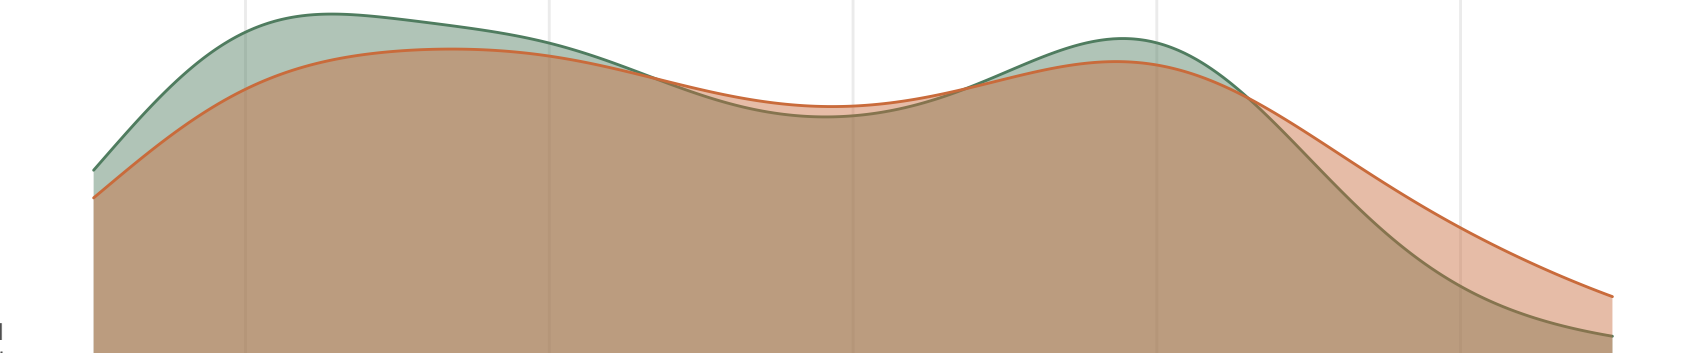

# AI Beliefs — Future Integration

Response distributions by condition | Reversed items rescored

Item 21: The integration of generative AI technologies like ChatGPT in higher education will have a positive impact on teaching and learning in the long run

Item 22: I envision integrating generative AI technologies like ChatGPT into my teaching and learning practices in the future

Traditional\_First AI\_First

Bandwidth = 0.6 on 1–5 ordinal scale. Bimodal ridges = polarized item.
